Microlink MLxs with Cochlear Nucleus 5 bte

You will need:

- Euro accessory adaptor

The Euro accessory adaptor can be used with behind-the-ear receivers:
  - Phonak MLxS
  - Phonak MicroMLxS

Please be aware that the adaptor is not compatible the MLXi receiver at present.

What to do:

1. Turn OFF the processor.
2. Insert the FM receiver into the three pin socket on the Euro Accessory Adaptor.
3. Turn on the FM receiver (according to manufacturer’s instructions – usually to two dots)
4. Turn on the processor.
5. Connect the Euro Accessory Adaptor to the processor accessory socket.
**Troubleshooting**

Using the monitor earphones, you can listen to the FM receiver. Follow the above instructions, but connect the monitor earphones into the processor accessory socket and the Euro Accessory Adaptor into the monitor headphones socket.
